This document is available on CD-ROM.

This document was prepared using VAX DOCUMENT, Version 2.1.

Preface

Purpose of This Index

The *Master Index* is intended to help you find information in the DEC 4000 AXP Customer Kit and the DEC 4000 AXP Service and Self-Maintenance Kit.

Who Should Use This Index

This index is for system managers and others who perform system management tasks; for Digital service representatives; for engineers who are designing equipment that interfaces to the DEC 4000 AXP system; and for general users of the system.

Structure of This Index

This index contains entries for the following documents. A key is used to designate each document.

- DEC 4000 AXP Model 600 Owner's Guide—OWNR
- DEC 4000 AXP Model 600 Service Guide—SVCE
- DEC 4000 AXP Model 600 Technical Manual—TECH

The master index also contains pointers to the following additional documents:

- DEC 4000 AXP Model 600 Site Preparation
- DEC 4000 AXP Model 600 Quick Installation
- DEC 4000 AXP Model 600 Options Guide

Finding the Documents and Courses You Need

On the front page of this guide, an "Information Map" shows you how the DEC 4000 AXP information products are organized. Documents can be ordered separately or as complete kits.

Two DEC 4000 AXP documentation kits are available: a Customer Kit and a Service and Self-Maintenance Kit. To order a kit, use the appropriate kit part number shown in Table 1 and 2. Order individual documents by the document's part number.

The kit contents are as follows:

Table 1 Customer Documentation Kit: EK-KN430-KT

Document	Part Number
DEC 4000 AXP Quick Installation	EK-KN430-IN
DEC 4000 AXP Information Map	EK-KN430-IM
DEC 4000 AXP Site Preparation Checklist	EK-KN430-SP
DEC 4000 AXP Owner's Guide	EK-KN430-OP

Table 2 Service and Self-Maintenance Kit: EK-KN430-DK

Document	Part Number
DEC 4000 AXP Quick Installation	EK-KN430-IN
DEC 4000 AXP Information Map	EK-KN430-IM
DEC 4000 AXP Service Guide	EK-KN430-SV
DEC 4000 AXP Options Guide	EK-KN430-OG
DEC 4000 AXP IPB: Enclosure	EK-EN430-IP
DEC 4000 AXP IPB: Mass Storage	EK-MS430-IP
DEC 4000 AXP IPB: Pedestal System	EK-SY430-IP
DEC 4000 AXP Master Index	EK-KN430-MI
DEC 4000 AXP Technical Manual	EK-KN430-TM
DSSI VAXcluster Installation and Troubleshooting	EK-410AA-MG

You may also wish to order related Alpha AXP or DEC 4000 AXP documents or take relevant courses. The following table lists some additional documents, periodicals, and courses.

Table 3 Related Documents and Courses

Document	Part Number
Alpha AXP Systems Handbook ¹	
Systems and Options Catalog ¹	
DEC 4000 AXP Information Sheet ¹	EC-F2006-41
Digital's Customer Update ¹	
Digital Insight ¹	
OpenVMS Alpha V.1 Installation Manual	AA-PQYSA-TE
Guide to Installing DEC OSF/1	AA-PS2DA-TE
Courses	Part Number
DEC 4000 AXP System Installation and Troubleshooting	EY-I090E-CO (Digital Services)
Alpha Architecture Concepts	EY-K725E-MT, -TK
Futurebus+ Concepts	EY-F479E-CO (Digital Services)
¹ Contact your Digital sales representative for availability.	

For complete ordering instructions, see "How to Order Documents and Courses," at the back of this book.

For customer convenience, the DEC~4000~AXP~Model~600~Owner's~Guide is available on CD–ROM, as well as in hardcopy. The CD–ROM order number is QA–03XAA–H8.

To assist Digital service representatives, the complete DEC 4000 AXP information set is available through TIMA (Digital's Technical Information Management Architecture) as printable PostScript files. In addition, the *Service Guide* and *Owner's Guide* are available through TIMA in Bookreader format.

Index

auto_action environment variable (cont'd) uses of, OWNR, 4–5 Auxiliary serial line, TECH, 16–2 Auxiliary serial port, TECH, 16–2; OWNR, 2–2; SVCE, 691 changing baud rate setting, OWNR, 4–15 AUX_CTRL, TECH, 16–4 AUX_Data register, TECH, 16–4 Availability, system, OWNR, 6–5	Baud rates, TECH, 1–9 auxiliary serial port, SVCE, 691 console serial port, SVCE, 686 Bcache See Backup cache BCCEA, TECH, 5–11 BCREQ L, TECH, 19–10 BC_TAG, TECH, 4–36 bin command, TECH, D–3 BIP flag, TECH, 24–2
