

AV-R0NEC-TE

**DIGITAL MultiSwitch 600 System**

**March 1998**

**READ ME FIRST**

Dear Customer,

Thank you for buying this DIGITAL product. Prior to using your new DIGITAL MultiSwitch 600 System you must install and setup the basic stack components and then install the 600-series functional modules you need for your LAN. The following table describes how to get your system up and running.

Step	Action	Using . . .	Located in . . .
1	Open the plastic bag containing the QC kit.	Tape (pull back tape)	Box with shipped components
2	Check the part numbers. (If any of the components are missing, call 1-800-DIGITAL (344-4815) for replacement.)	Part Listing in this Read Me First letter	QC kit in box
3	Read the system's requirements/restrictions.	Release Notes	QC kit
4	Install the Stack Director and/or Stack Station.	Either the <i>DIGITAL MultiSwitch 600 System Installation and Configuration</i> manual or the <i>DIGITAL MultiSwitch 600 System Quick Start</i> card	Box with Stack Director or Stack Station
5	Install and configure a 600 series functional modules in the stack.	Either the module's Installation and Configuration manual or the Quick Start card.	Box with 600 series functional modules

**Note:** As a result of the recent agreement between Digital Equipment Corporation and Cabletron Systems Inc., the DIGITAL MultiSwitch 624EX product will be no longer offered. For alternative products, please refer to the following location:
