## 100Mb/s Fast Ethernet Modular Media Interface Customer Letter

Dear DIGITAL MultiSwitch 600 Customer:

Thank you for purchasing a 100Mb/s Fast Ethernet Modular Media Interface 100BaseFX (DLXFX) or 100BaseTX (DLXTX) uplink for your DIGITAL MultiSwitch 612EX.

In order to fully utilize your 100BaseFX or 100BaseTX Modular Media Interface in the DIGITAL Multi-Switch 612EX (DLMWL) product, you must be running clearVISN Stack Manager Version 2.1 or Multi-Chassis Manager Version 6.1.

Again, thank you for purchasing a DIGITAL product.

## Accessing Online Information

For further information on DIGITAL network products or topics refer to the DIGITAL Network Product Business (NPB) Web Site as well as its Bulletin Board System. Both systems maintain a common, rich set of up-to-date information on NPB's products, technologies, and programs.

The Web Site can be reached at geographic locations via the following URLs:

| | |
|---|---|
| Americas Network Product Business Home Page | http://www.networks.digital.com/ |
| Europe Network Product Business Home Page | http:/www.networks.europe.digital.com/ |
| Australia Network Product Business Home Page | http://www.digital.com.au/networks/ |
| Digital Equipment Corporation Home | http://www.digital.com/ |
| Japan Network Product Business Home Page | http://www.dec-j.co.jp/ic/network/ |

To get firmware and MIB information, please choose the "Technical Information" link, and from there choose the "Technical Information (Drivers, Manuals, Tech Tips, etc.)" link. You will see a listing of all the products available on the NPB Web Site.

To connect to the Network Product Business Bulletin Board System, you need a PC and a modem. Set your modem to 8 bits, no parity, 1 stop bit. Dial 978-506-5777 (U.S.A.).
